

Ensure Officer Safety, Limit Distractions While Driving

- *Disable the Keyboard*
 - *Disable the Touch Screen*
 - *Disable the Display*
- ... you decide*

ScreenSafe's Software solution ensures your safety policy is followed by all MDT's

- *Totally Customizable*
- *Doesn't interfere with other applications*
- *Easy to install and manage*
- *Reduces Risk of Lawsuits*
- *Can be configured to your rules*
- *Customized rules for different Depts.*
- *Web based administration*

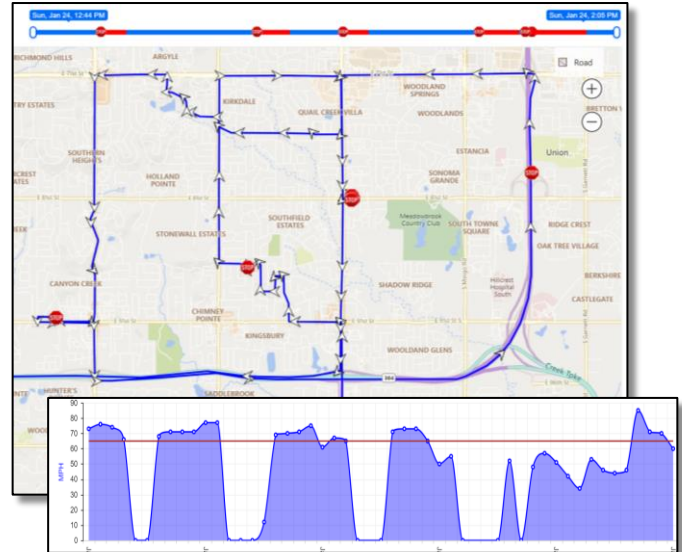

For a fraction of the cost of settling a single officer caused distracted driving accident you could equip your entire department with ScreenSafe. ScreenSafe ensures officers are not only complying with safety policies, but also are not putting the city or county at risk for a million-dollar lawsuit.

*From **\$65** to **\$95** per license per year

Why Your Agency Needs ScreenSafe

ScreenSafe is a Windows software only solution that allows a law enforcement agency to limit the officer's ability to type while driving. The MDT keyboard can be either partially or completely disabled when the vehicle exceeds a specific speed. ScreenSafe does not interfere with any applications running on the MDT.

Law enforcement agencies can now ensure their existing "distracted driving" safety policies are being followed by officers in the field. In an emergency, if allowed, the officer may choose to override all restrictions and regain control of the MDT at any speed; all overrides are saved in a report.

A great way to demonstrate your agency's commitment to reducing distracted driving accidents is by taking a pro-active stance to restrict typing without limiting your officer's access to the MDT when needed.

The three versions of ScreenSafe are Standard, Pro & Elite

STANDARD

ScreenSafe will disable the Screen and Keyboard when the vehicle is in motion.

\$65/Vehicle
